

## TIMCO Aviation Services Fact Sheet

### Overview

TIMCO Aviation Services is one of the largest providers of maintenance, repair and overhaul (MRO) services in the world, and is also a growing interiors engineering and manufacturing company. Over the years, the privately held company has grown beyond its core base maintenance business into engine MRO services, aircraft seat manufacturing and PMA parts, interiors engineering design and manufacturing through its TIMCO Aerosystems division and line maintenance services at a large number of airports through its TIMCO LineCare network.

### Facts

- DERs and DMIRs on site at each of its three MRO locations

### Airframe Base Maintenance

TIMCO operates airframe MRO facilities in Greensboro, North Carolina, Macon, Georgia and Lake City, Florida, all providing a complete scope of services including C checks, HMVs and modifications. The division employs over 1,000 mechanics—many of whom are certificated—and uses nearly 1.5 million square feet of total hangar and office space.

- Greensboro, North Carolina Airframe Base Maintenance
  - 705,000 square feet hangar space
  - 4 hangars; 12 bays
  - B737; B757; B767; B777; DC8; DC9/MD80/90; DC10/MD10/KC10/MD11; A300/310; A320 series; C130/L382
  - Complete backshop support
  - Specialty composite shop (manufacture and repair)
  - Structures center (manufacture and repair)
  - On site engineering
- Lake City, Florida Airframe Base Maintenance
  - 632,000 square feet hangar space
  - 8 hangars; 1 paint hangar; 11 bays airframe; 2 bays paint
  - B727; B737; B757; DC9/MD80/MD90; DC10/MD10/MD11; A320 series; C130/L382
  - Complete backshop support
  - Specialty composite shop (manufacture and repair)
  - Structures center (manufacture and repair)
  - On site engineering
- Macon, Georgia Airframe Base Maintenance
  - 116,000 square feet hangar space

- 2 hangars; 3 bays
- B737; B757; B767; DC9/MD80/MD90; DC10/MD11; A320 series
- Back shop support
- On site engineering
- TIMCO – Coopesa Airframe MRO Partnership, San Jose, Costa Rica
  - FAA and EASA Part 145 certified
  - 86,000 square feet hangar space
  - 2 hangars; 6 bays
  - B727; B737; B757; DC9/MD80; A320 series
  - On site engineering
  - Back shop support
  - TIMCO support for customers on site

## **TIMCO Aerosystems**

TIMCO Aerosystems manufactures a full line of aircraft interiors products including seats (formerly Brice Seating), galleys and lavatories. In addition, TIMCO Aerosystems is a project integrator certified by the FAA with Organization Delegation Authorization (ODA) authority and holds extensive OEM and integration capabilities on retrofit programs. It is unique within the industry in its ability to support customer operations with everything from initial engineering and design to complete, in-house systems and structures manufacturing, integration and certification services. Aerosystems' products and services are designed and produced from two locations in North Carolina as well as a multi-facility location in California. All products can be sent to a customer's designated location, installed at any of TIMCO's own airframe MRO and modifications operations or at TIMCO LineCare™ locations across the United States.

- Engineering Integration Services
  - Single aircraft or complete fleet retrofit programs
  - Opportunity to include installation through TIMCO MRO hangar facilities
  - Avionics and electrical systems
  - Plumbing and waste systems
  - IFE
- Manufacturing Services
  - FeatherWeight™ seating
  - FeatherWeight™ galleys
  - FeatherWeight™ lavatories
  - Carpet cut and kitting (fleet support)
  - Crew rest areas
  - Other interior monuments (e.g. closets; stowage bins; etc.)
  - PMA parts for a variety of seats and interiors monuments
  - Parts kitting
- Other Services
  - Cabin LifeCare™ total interiors product support
  - Fleet engineering support services
  - Testing and certification services

## **Engine Support Services**

TIMCO's Engine Center is located in a dedicated facility on the former Wurtsmith U.S. Air Force Base in Oscoda, Michigan (about three hours north of Detroit). The facility provides customers with a comprehensive range of engine MRO services and includes a complete test cell, rated up to 52,000 pounds of thrust. Services cover:

- JT8D (all series) complete engine MRO
- JT8D (all series) complete on wing support (including AOG)
- On-wing and AOG field support

## **TIMCO LineCare™**

TIMCO LineCare™ services are currently offered under Operations Specification D107 certification at airport locations across the U.S., with more new locations planned. TIMCO performs a range of line maintenance and cabin refurbishment services, including overnight line checks, transit checks, cabin refurbishment and on call services.

- Services Offered
  - Overnight checks and non-routine maintenance
  - Logbook clearance
  - Deferred and MEL items
  - Pilot reports
  - Field services – on-call availability; complete U.S. coverage
  - Cabin maintenance and refurbishment programs (including TIMCO's new Cabin LifeCare™ total support)
  - GSE maintenance
  - 24/7/365 operations center support
