

# FeatherWeight™ Lav Refresh Programs

## TIMCO. SIMPLY SUPERIOR INTERIOR UPGRADES

TIMCO Aerosystems specializes in developing custom interior monument and system solutions that far exceed customer expectations in terms of weight, serviceability, cost, turn-time — and increased passenger satisfaction. TIMCO is also the only company that can utilize in-house capabilities, expert staff and other resources to facilitate every aspect of the program—from development and design through manufacture, installation, certification and product support over the long haul.

**Our solutions are lightweight.  
Our capabilities aren't.**

### LAV SYSTEM HIGHLIGHTS

- Smooth contour
- Open spacious feel
- Ergonomic design
- Refined comfort and functionality
- Inset mirror LED lighting
- Lightweight composite counter top
- One control for water supply/temp
- Handicap provisions
- Component replacement
- Complete lav replacement

# FeatherWeight™ Lav Refresh Programs

TIMCO Aerosystems is uniquely proactive in finding interior design solutions that provide the competitive advantage to airlines over the long haul.

Recently TIMCO designed, built and certified the first ever 767 mobile crew rest module for a prominent European airline. It was on-time and on-budget.

TIMCO customers avoid complexity by keeping everything from initial design through certification with a single, trusted organization.
